

Feature Description

Login page: ability to log in as an employee or as an HR administrator

Connected as an employee:

- After logging in on the login page, the employee arrives on the Expenses report that they have already submitted. It includes relevant data, such as the status of the expense report. They can determine whether their last expense report was validated or not, and can also view the receipt or download the PDF file.
- By clicking New Expense Report, they can enter the information for a new expense report. If they click Send, the expense report is sent to the HR administrators.
- If they navigate back, they remain logged on.
- Clicking the Logout button returns them to the login page.

Logged in as HR administrator:

- After logging in on the login page, the administrator arrives on their dashboard. On the left, they will see a feed with all employee expense reports, grouped by status (pending, accepted, refused).
- If they click one of the expense reports in pending status, they can accept or refuse the expense report.
- If they click on an expense report that has already been processed, they can view its information.
- If they click on an expense report, regardless of its status, they can view the receipt or download it.
- If they navigate backward, they remain on the same page.
- Clicking the Logout button returns them to the login page.
